

TABLETS OF FATE

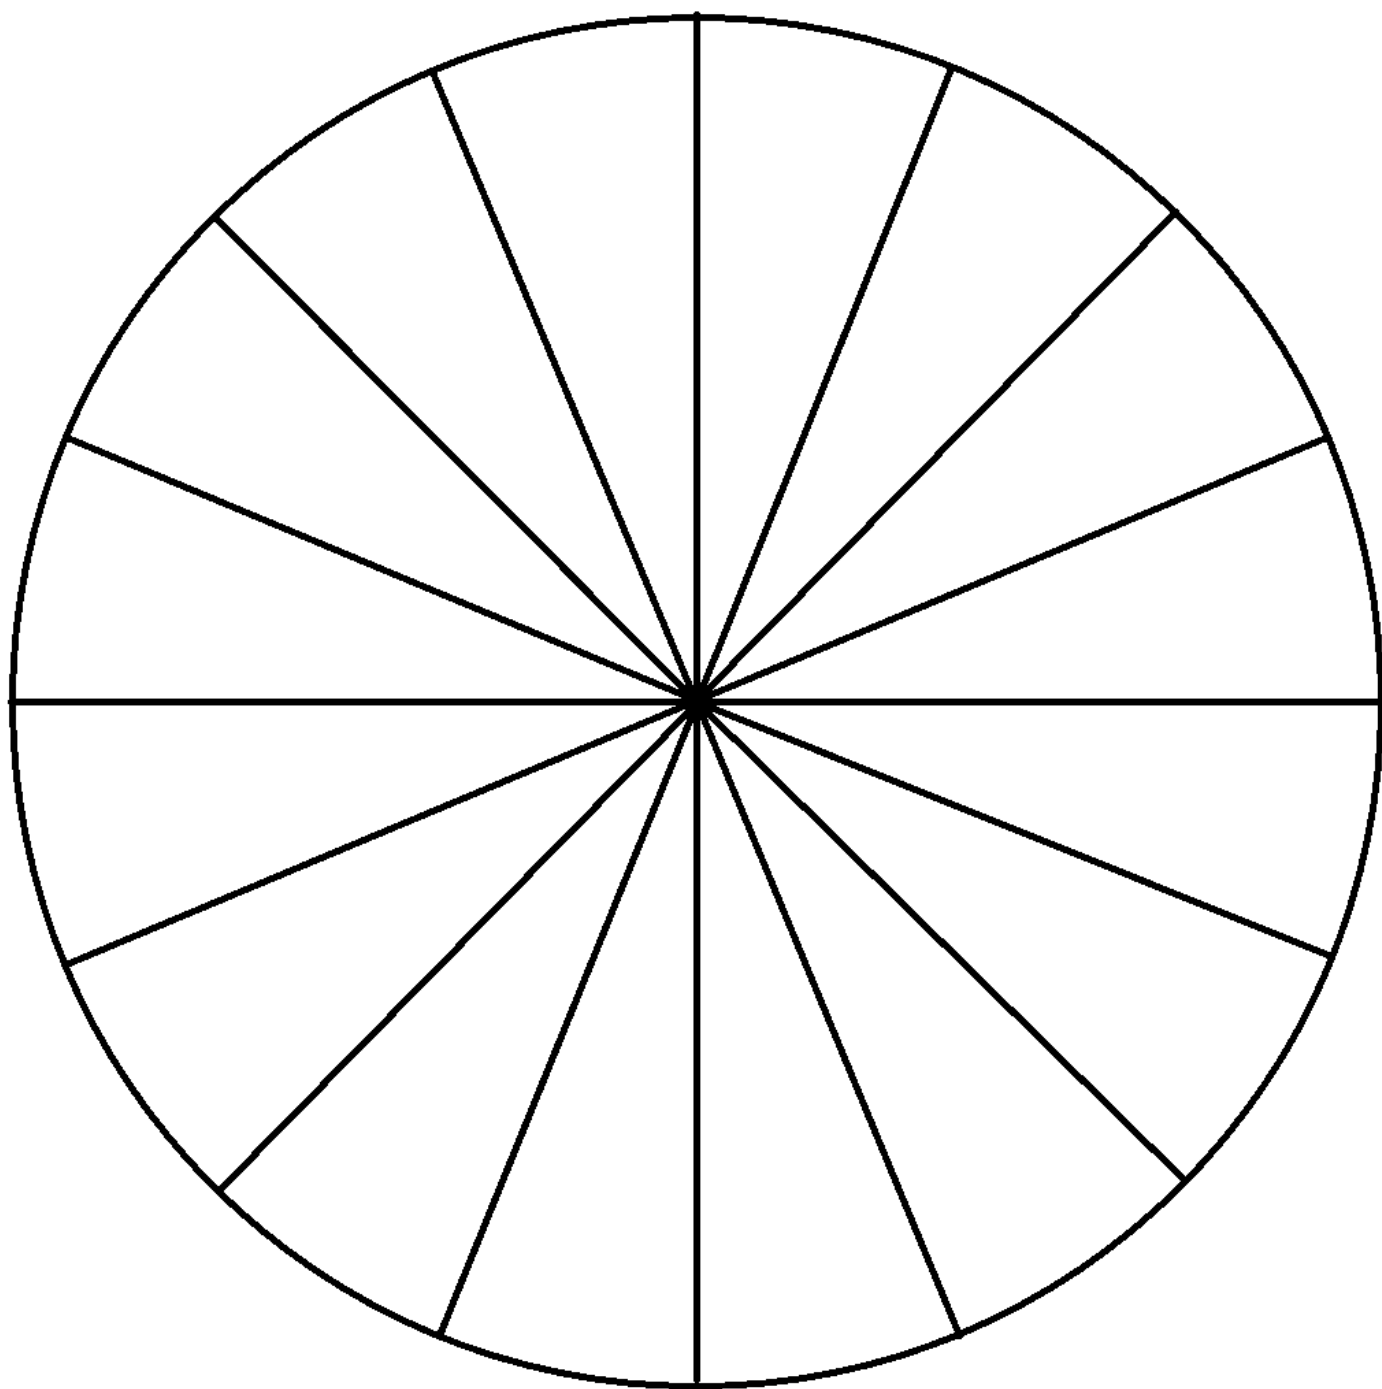

Blank Templates

Don't like the options you've been given? Want to try your hand at designing your *own* Tablets of Fate? On the following pages, I have included the blank templates for the three main shapes of the Tablets of Fate-the square, the diamond and the circle-plus the numbers 1 through 16. (When deciding which number went in which box, I printed out the numbers, cut them up into squares, folded them, then drew them at random out of a bowl).

The Tablets of Fate were traditionally named after the Gods/Planets, but you can name your tablet(s) anything you like. Note: before I started asking what numbers They wanted where, I first asked the Heavenly Bodies whose Tablets I personally designed, which shape they wanted their tablet to be – circle, square or diamond. I recommend you do this too. It's a courtesy to Whoever/Whatever you are naming your tablet for, because shows you are taking Them seriously and care about Their input, and I think the number distribution you derive after that is more assured of coming from the Entity in question. I based the answers for each of the tablets I designed on the numerological significance of each of the sixteen numbers, and tried to relate it to the areas of life the Entity in question is associated with/rules.
