

Over-the-Shoulder Card Box

Instructions:

Print this out on good card-stock-weight paper. I recommend you coat both sides of the box with spray-acrylic sealer before cutting out the box-shape around the outer, dark lines. Cut out the slot over the title-side of the card box, so you can tuck the opposing flap in to close the box when it's assembled. Using a straight edge, such as a ruler, fold along the light-gray lines inward toward the blank side of the box. Then gently assemble the box, using glue or tape to secure the bottom and side-tabs in place.
