

# Domino Divination for the Year Ahead

## Instructions

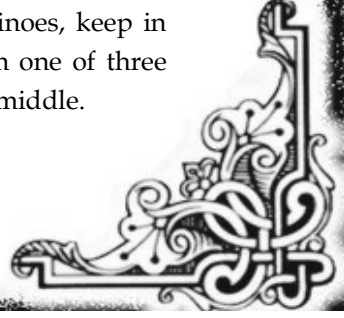

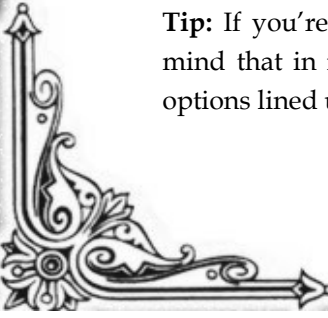

**For Individual Play:** From a 28-domino set, remove all the half-blank dominos from the set, but leave the double-blank in. Lay all the remaining dominos face-down on the table and swirl them around, asking the Spirits to guide your hands to the three dominos which will reveal your fortune for the coming year. Draw three dominoes at random and turn them face-up. Your coming year will be an amalgamation of all three.

**For Group Play:** As with individual play, all the half-blank dominos should be removed from the set, but leave the double-blank domino in. The remainder are laid face-down and swirled around on the table. If you want to roll a die, or a pair of dice to determine in what order participants will draw tiles, that would be done at this stage. Saying a prayer or setting an intention that everyone receive a true reading is always a good idea. A good, all-purpose one is: *"A reading true I seek to find, and take what comes with quiet mind."* After this point, there are two options for play:

**Option One:** Everyone takes their turn drawing three tiles from the bone-pile until there are only one or two tiles left unselected on the table.

**Option Two:** Each participant takes their turn drawing three tiles from the bone-pile, notes which three they are, then immediately returns those three tiles to the bone-pile, face-down. The bone-pile is swirled again. The next player repeats the process of drawing three, noting the answer, then returning those tiles to the pile. In option two, the pile is swirled around after *each* player takes their turn.

**Tip:** If you're at a loss as to where to aim when drawing your three dominoes, keep in mind that in many fairy tales, when the main character has to choose from one of three options lined up in front of them, the correct answer is usually the one in the middle.
