

Fadic Years

As Calculated by the Progressive Formula

Fadic years are years in a person's life when something important, crucial or fated happens in that person's life. These can be seen as turning points in the life of the subject. To determine what these 'fated' years are, follow the step-by-step instructions below:

Name: _____

Year of Birth: _____

Add up digits in the year of birth as a line problem,
& leave it as a compound number, don't reduce it to a single digit:

$$+ \quad + \quad + \quad = \underline{\quad}$$

Add the year of birth + its compound number:

+

The result above is the first fadic year of life. Add up the digits in the first fadic year and reduce to a single digit or master number, in order to learn the essential nature of the likely crucial change which will happen this year:

$$+ \quad + \quad + \quad = \underline{\quad} = \underline{\quad}$$

Subject's Age This Year: _____

Nature of the Year:

Result:

To find the second fadic year of life, add together the first fadic year of life, and the compound number derived from the first fadic year of life:

+

The result above is the second fadic year of life. Add up the digits in the second fadic year, then reduce to a single digit or master number, in order to learn the essential nature of the likely crucial change which will happen this year:

$$+ \quad + \quad + \quad = \underline{\quad} = \underline{\quad}$$

Subject's Age This Year: _____

Nature of the Year:

Result:

Fadic Years

As Calculated by the Progressive Formula

To find the third fadic year of life, add together the second fadic year and its compound number:

+

The result above is the third fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

To find the fourth fadic year of life, add together the third fadic year and its compound number:

+

The result above is the fourth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

Fadic Years

As Calculated by the Progressive Formula

To find the fifth fadic year, add together the fourth fadic year and its compound number:

+

The result above is the fifth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

To find the sixth fadic year, add together the fifth fadic year and its compound number:

+

The result above is the sixth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

Fadic Years

As Calculated by the Progressive Formula

To find the seventh fadic year, add together the sixth fadic year and its compound number:

+

The result above is the seventh fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

To find the eighth fadic year, add together the seventh fadic year and its compound number:

+

The result above is the eighth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

Fadic Years

As Calculated by the Progressive Formula

To find the ninth fadic year, add together the eighth fadic year and its compound number:

+

The result above is the ninth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:

To find the tenth fadic year, add together the ninth fadic year and its compound number:

+

The result above is the tenth fadic year of life. Reduce this year to a single digit or master number, in order to learn the essential nature of this crucial year:

+ + + = _____ = _____

Subject's Age This Year: _____

Nature of the Year:

Result:
