

TABLET OF THE LUCKY FOUR-LEAFED CLOVERS

This tablet is designed to answer questions concerning luck, sudden good fortune, hopes & wishes. It should not be consulting more than once every 37 days.

RULES

This tablet is designed to answer all questions concerning luck, sudden good fortune, and the fulfillment of hopes or wishes. Only a direct hit on one of the petals of one of the clovers is considered a valid answer. The inquirer is permitted a total of three attempts. If in three attempts the inquirer fails to select a clover-petal, then the time is not yet ripe for an answer, and they must wait 24 hours. If in 24 hours, no answer is selected in three tries, then the inquirer must wait 37 days before trying again.

While waiving the pointer above the Tablet, the inquirer is supposed to say the following words: *Lucky clovers answer me, Tell me what my luck will be*, then immediately bring the pointer down on the diagram, observe what the number is, then look for their fortune in the answer key below.
