

## Psychic Hearing Test

Have you ever heard your name called without it's having been spoken?	Y	N
If it sounded like someone nearby, did you ask them if they called you, & they denied it?	Y	N
Have you ever heard a certain song play in your mind (called an earworm) & on second thought, it provided you with insight and information about a current issue in your life?	Y	N
Have you ever talked to yourself out loud about a matter of concern to you and then gotten useful 'echo' answers coming from somewhere inside your own head?	Y	N
Have you ever been thinking thoughts so 'loudly' that it appears you projected it to another psychically, and they recall you said something you know you didn't say?	Y	N
Have you ever 'heard between the lines? That is, have you heard a statement radiate through the air waves psychically that wasn't actually said out loud? (And if you mention it later, they deny having said it?)	Y	N

The more questions you said 'Yes' to, the greater your potential for clairaudience. A 'Yes' to all of them, you're definitely clairaudient. If you said 'Yes' to only one or two, the potential is there, but you'll have to work harder to develop the ability.
